

THE SPIRAL TALK

BY CAROL BÄRTGES

Your child's journey through their twelve-year experience at Steiner is at the core of this presentation on the spiral curriculum. Tracing the intentional thematic relationships and connections inherent in the subjects taught throughout the twelve grades, this talk reveals Rudolf Steiner's deliberate, forward-thinking ideas concerning the development of the human being, from first grade up through the end of high school.

Carol is an alumna, a parent of two graduates, Max '03 and Sarah '05, and has served in many roles, among them as a class teacher, an upper school teacher, the College Chair and High School Chair. In addition to teaching, Carol is currently the Co-Chair of the College and an adjunct faculty member of the Mentoring Training Program at the Center for Anthroposophy in New Hampshire.
